BALANCED PORTFOLIO FACTSHEET

ABOUT THE PORTFOLIO

The Balanced Portfolio is a market related portfolio that aims (but does not guarantee) to provide a return that exceeds inflation by 5.5% per annum net of fees over measurement periods of at least five years. The portfolio is thus most suitable for members that have a long investment horizon (five years or more) and whose objective it is to earn a return well ahead of inflation over the long term.

The Balanced Portfolio is diversified in nature and has a high exposure to growth assets (i.e. South African and global equity) and thus investment returns are likely to be volatile. Large positive or negative returns are possible, particularly over short periods. This investment approach requires members to have the courage and patience for long term investing and not to be unsettled by short term underperformance compared to the peer group.

The Balanced Portfolio's local assets are managed by South African managers with local balanced mandates whilst a specialist approach is followed in respect of the offshore assets whereby each offshore manager is a specialist in its specific asset class.

All pre-retirement members' monies are invested in the Balanced Portfolio up to five years before retirement age when the de-risking phase commences.

ASSET MANAGER CONFIGURATION AS AT 30 SEPTEMBER 2021

Asset class mandate	Investment manager	Actual	Strategic
Domestic balanced	Coronation, Ninety One, Allan Gray, Prudential, Kagiso, Laurium Capital	66.4%	66.5%
Domestic defensive	Abax	3.4%	3.5%
Domestic cash	AFI Banker	0.1%	0.0%
Global equity	Lansdowne Partners, Orbis, Ardevora, Lindsell Train, GQG	22.3%	21.6%
Global property	Resolution Capital	3.6%	4.2%
Global defensive	Ruffer	4.2%	4.2%
Total		100.0%	100.0%

TOTAL INVESTMENT CHARGES (TIC) 12 MONTHS TO 31 DECEMBER 2020

	Annual % of assets (incl VAT)
Management Fee	0.60%
Performance Fee	0.00%
Other Fees*	0.07%
Total Expense Ratio (TER)	0.67%
Transaction Costs (TC)	0.13%
Total Investment Charge (TIC)	0.80%

*Other fees include: audit fees, custody fees, fund expenses and VAT

The TIC represents the estimated total fees as a percentage of the portfolio charged over the 12-month period. The TIC includes annual investment management fees (the largest component), performance fees where applicable, estimated transaction costs and all other relevant costs. The TIC is reported annually.

CALENDAR YEAR PERFORMANCE

All investment performance figures shown are net of fees, i.e. returns credited to TFG Retirement Fund members.

Year	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Calendar year return	Inflation p.a.
2021	3.6%	4.0%	1.3%	1.4%	0.8%	0.0%	1.8%	2.0%	-0.2%				15.7%	4.5%
2020	0.7%	-4.0%	-10.9%	10.8%	-0.9%	3.2%	1.7%	0.6%	-1.7%	-2.6%	5.9%	4.5%	5.9%	3.1%
2019	0.7%	3.2%	1.5%	2.5%	-4.3%	1.4%	-1.0%	0.8%	1.2%	1.7%	-0.9%	1.8%	8.4%	4.0%
2018	0.8%	-1.5%	-2.0%	3.9%	-1.7%	2.7%	-0.4%	4.3%	-2.7%	-2.9%	-4.1%	1.5%	-2.5%	4.5%
2017	1.8%	-1.0%	1.5%	2.2%	-0.2%	-2.1%	3.4%	0.6%	1.0%	4.7%	0.3%	-0.9%	11.5%	4.7%
2016	-1.1%	1.0%	3.5%	1.1%	2.6%	-2.5%	0.8%	2.2%	-1.6%	-2.7%	1.1%	0.6%	4.9%	6.8%

PERFORMANCE TO REPORT DATE

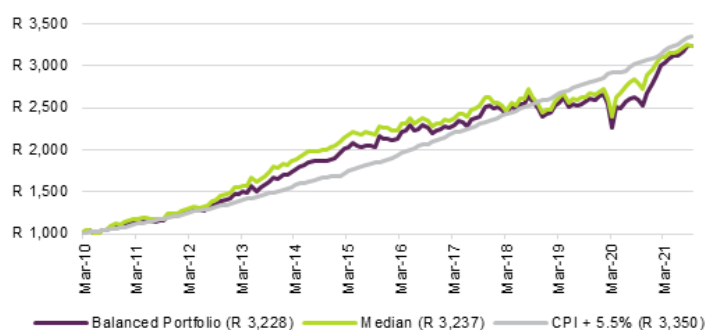

Note: The median performance is the Global Balanced Peer group median return of the WTW Full Discretion peer group excluding managers with less than R1 billion in assets. The peer group returns are adjusted to allow for assumed manager fees of approximately 0.7% p.a. in the long term.

Performance figures are net of fees and has been annualised for periods longer than one year.

CUMULATIVE PERFORMANCE TO REPORT DATE

The chart illustrates the cumulative value of R1,000 invested in the Balanced Portfolio on 1 March 2010 (the inception date), compared to the extent to which R1,000 would have grown had it been invested by the median manager and finally had it grown with the target performance of headline inflation (CPI) + 5.5% p.a.

MARKET INDICES RETURNS

The table shows the performance of relevant market indices (all in rand) over various measurement periods to the report date.

	3 months	1 year	3 years (p.a.)	5 years (p.a.)	7 years (p.a.)
SA Equities (ALSI)	-0.8%	23.2%	8.6%	7.8%	7.2%
SA listed property	6.5%	58.1%	-8.3%	-6.7%	-1.8%
SA Bonds	0.4%	12.5%	9.1%	8.5%	8.2%
SA Inflation Linked Bonds	2.0%	15.9%	5.5%	3.5%	4.4%
SA Cash	1.0%	3.8%	5.8%	6.4%	6.5%
Global Equities	5.5%	16.7%	16.1%	16.4%	15.7%
Global Property	4.6%	18.0%	9.4%	7.4%	11.1%
Global Bonds	4.1%	-12.8%	5.9%	3.2%	6.0%
Rand / USD Dollar	5.4%	-9.8%	2.1%	1.8%	4.2%
Inflation (CPI)	1.7%	5.0%	4.0%	4.4%	4.7%

ROLLING 5-YEAR RETURNS

The chart illustrates the 5-year rolling performance of the Balanced Portfolio relative to the inflation target.

RISK STATISTICS

Risk statistic	Balanced Portfolio	Peer group median
Std dev (%)	8.4%	8.7%
Downside risk	8.8%	8.5%
Sortino ratio	121.6%	125.1%
Max drawdown (%)	-14.5%	-15.4%
Max drawdown # of months	2	2
Max drawdown recovery # of months	8	8

The risk statistics reflected above are calculated over the period since inception (139 months).

Standard deviation is a measure of how widely the annual return is dispersed – the lower this measure, the less absolute risk.

Downside risk is a variation of standard deviation in that it measures the deviation of only bad volatility, i.e. in this case where the returns are below zero. In other words, it measures how large the deviation in losses is.

The *Sortino ratio* measures the return generated per unit of risk of losing capital, as measured by the downside risk. The higher this ratio, the better the risk adjusted return.

Maximum drawdown shows the maximum that the portfolio was down from a peak before it recovers back to the peak.

Disclosure statement

This document has been prepared for the TFG Retirement Fund by Towers Watson (Pty) Ltd ("Willis Towers Watson").

The information contained in this document is for general information purposes only and it should not be considered a substitute for specific professional advice. This document is based on information available to Willis Towers Watson at the date specified and takes no account of developments after that date. In preparing this document Willis Towers Watson has relied upon information supplied to it by third parties. TFG RETIREMENT FUND

30 SEPTEMBER 2021

PENSIONER PORTFOLIO FACTSHEET

ABOUT THE PORTFOLIO

The Pensioner Portfolio is a diversified portfolio created for those members of the TFG Retirement Fund that chose to purchase a guaranteed pension at retirement from the TFG Retirement Fund. The pension policy aims to provide increases equal to 100% of inflation over a 3-year period, and these are dependent on fund performance.

In order to meet this pension increase objective, the primary investment objective of the Pensioner Portfolio is to achieve a real return in line with the post-retirement interest (PRI) rate set by the Actuary and agreed to by the Trustees for determining the Pensioner liabilities. As at 30 September 2021, the PRI is 4.5% p.a.

The Pensioner Portfolio is defensive in nature and has a high exposure (50%) to South African government bonds and other fixed interest assets that are managed in such a way that the Portfolio's assets and liabilities move in line with each other, leading to a more stable funding level. The remainder of the Portfolio's assets are invested in growth assets (i.e. South African and global equity) and thus investment returns on this part are likely to be volatile, but are expected to earn a higher return than the defensive part of the portfolio.

ASSET MANAGER CONFIGURATION AS AT 30 SEPTEMBER 2021

Asset class mandate	Investment manager	Actual	Strategic

FINAL YEAR PORTFOLIO FACTSHEET

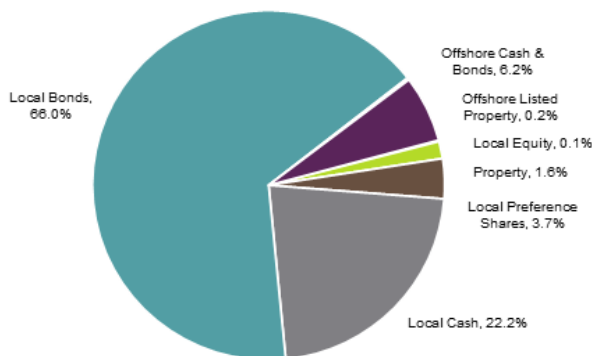

ABOUT THE PORTFOLIO

The Final Year Portfolio is a conservatively managed portfolio that invests in local and offshore money market, bonds, property, preference shares, inflation-linked bonds and derivatives to meet the investment objective.

The primary investment objective of the Final Year Portfolio is to achieve a real return of 2.0% p.a. (net of all costs) over rolling 12-month periods. The secondary investment objective of the Final Year Portfolio is capital preservation, i.e. no negative returns, over any 12-month period.

As at 30 September 2021, Prescient Income Provider is the only underlying investment of the Final Year Portfolio.

EFFECTIVE LOOK-THROUGH ASSET ALLOCATION AS AT 30 SEPTEMBER 2021

Performance figures are net of fees and has been annualised for periods longer than one year.

CUMULATIVE PERFORMANCE TO REPORT DATE

The chart illustrates the cumulative value of R1,000 invested in the Money Market Portfolio on 1 March 2010 (the inception date), compared to the extent to which R1,000 would have grown had it been invested in the benchmark (STeFI Composite) and finally had it grown with the target performance of headline inflation (CPI) + 1.0% p.a.

MARKET INDICES RETURNS

The table shows the performance of relevant market indices (all in rand) over various measurement periods to the report date.

	3 months	1 year	3 years (p.a.)	5 years (p.a.)	7 years (p.a.)
SA Equities (ALSI)	-0.8%	23.2%	8.6%	7.8%	7.2%
SA listed property	6.5%	58.1%	-8.3%	-6.7%	-1.8%
SA Bonds	0.4%	12.5%	9.1%	8.5%	8.2%
SA Inflation Linked Bonds	2.0%	15.9%	5.5%	3.5%	4.4%
SA Cash	1.0%	3.8%	5.8%	6.4%	6.5%
Global Equities	5.5%	16.7%	16.1%	16.4%	15.7%
Global Property	4.6%	18.0%	9.4%	7.4%	11.1%
Global Bonds	4.1%	-12.8%	5.9%	3.2%	6.0%
Rand / USD Dollar	5.4%	-9.8%	2.1%	1.8%	4.2%
Inflation (CPI)	1.7%	5.0%	4.0%	4.4%	4.7%

ROLLING 1-YEAR RETURNS

The chart illustrates the 1-year rolling performance of the Money Market Portfolio relative to the inflation target.

RISK STATISTICS

Risk statistic	Money Market Portfolio	STeFI Comp
Std dev (%)	0.4%	0.6%
Downside risk	0.0%	0.0%
Sortino ratio	n/a	n/a
Max drawdown (%)	0.0%	0.0%
Max drawdown # of months	n/a	n/a
Max drawdown recovery # of months	n/a	n/a

The risk statistics reflected above are calculated over the period since inception (139 months).

Standard deviation is a measure of how widely the annual return is dispersed – the lower this measure, the less absolute risk. *Downside risk* is a variation of standard deviation in that it measures the deviation of only bad volatility, i.e. in this case where the returns are below zero. In other words, it measures how large the deviation in losses is. The *Sortino ratio* measures the return generated per unit of risk of losing capital, as measured by the downside risk. The higher this ratio, the better the risk adjusted return. *Maximum drawdown* shows the maximum that the portfolio was down from a peak before it recovers back to the peak.

TOTAL INVESTMENT CHARGES (TIC) 12 MONTHS TO 31 DECEMBER 2020

	Annual % of assets (incl VAT)
Management Fee	0.25%
Performance Fee	0.00%
Other Fees*	0.01%
Total Expense Ratio (TER)	0.26%
Transaction Costs (TC)	0.00%
Total Investment Charge (TIC)	0.26%

*Other fees include: audit fees, custody fees, fund expenses and VAT

The TIC represents the estimated total fees as a percentage of the portfolio charged over the 12-month period. The TIC includes annual investment management fees (the largest component), performance fees where applicable, estimated transaction costs and all other relevant costs. The TIC is reported annually.
